

SIMON HARTMANN

Computer Science Student · Game Developer

Aachen, Germany

siha@web.de

Portfolio: [simonhartmanndev](#)

GitHub: [SimonHartmannDev](#)

PROFILE

Computer Science student focused on gameplay programming with Unity and C#.

Experience developing solo games, including a Steam release, as well as working in a university development team. Currently looking for a practical semester opportunity in game development.

PROJECTS

Tanks of Chaos — Solo Developer

Unity · C# · October – December 2024

- Developed a wave-based tank combat game independently and released it on Steam.
- Implemented wave progression, multiple enemy behaviours, vehicle combat, upgrades and progression systems.
- Integrated persistent game data, multiple vehicles and Steam achievements.

Pirate Jumper — Solo Developer

Unity · C# · March 2026

- Developed an endless runner with modular runtime level generation.
- Implemented reusable gameplay systems, temporary items and cosmetic character progression.
- Built local persistence for highscores, currency and character unlocks.
- Used Git consistently throughout development.

Paruzzel — Gameplay Programmer

Unity · C# · Team of 5 · Summer Semester 2026

- Implemented first-person movement, interaction raycasting and a physics-based object pickup system.
- Developed a freecam tool for testing and navigating puzzle rooms.
- Contributed to early project planning, meetings and gameplay decisions.
- Worked with Git branches and merge conflicts in a collaborative workflow.

EXPERIENCE

Board Member / Server Administration

KönigsNet e.V. · 2022 – Present

- Help maintain and administer the association's Linux-based server infrastructure.
- Perform system updates, manage device access and troubleshoot technical issues.
- Maintain access-related configuration and support recovery using existing backups.
- Assisted with rebuilding large parts of the server environment from backups.

Tutor — Data Communication

RWTH Aachen University · 2024

- Led weekly tutorials and explained exercises and technical concepts.
- Answered student questions and supported them with coursework.
- Reviewed and graded submitted assignments.
- Assisted with grading final exams.

Voluntary Social Year (FSJ)

Gemeinschaftsschule im Eichholz · September 2020 – August 2021

- Supported teachers with classroom and organisational tasks.
- Co-managed Microsoft Teams administration during the COVID-19 period.
- Created and distributed user accounts, reset passwords and supported teachers with Teams-related questions.
- Supervised students who required on-site care during school closures.

EDUCATION

B.Sc. Computer Science

FH Aachen University of Applied Sciences

Winter Semester 2025 – Present

Computer Engineering

RWTH Aachen University

2025 · 1 Semester

Computer Science

RWTH Aachen University

2021 – 2024

Abitur

Goldberg-Gymnasium Sindelfingen

2020

TECHNICAL SKILLS

Programming

C#, Java

Game Development

Unity · Unity 2D · Unity 3D · Gameplay Programming · Player Controllers

Interaction Systems · Basic Enemy AI · Object Pooling · Wave Systems

Persistent Data · Modular Level Generation

Tools & Workflow

Git · GitHub · Feature Branches · Merge Conflicts · Linux · Team Development
