

SIMON HARTMANN

Computer Science Student · Gameplay Programmer · Unity (C#)

Aachen, Germany · siha@web.de

Portfolio: simonhartmanndev.github.io

GitHub: github.com/SimonHartmannDev

PROFILE

Computer Science student focused on gameplay programming with Unity and C#. Experience developing and releasing solo games, including a commercial Steam release, as well as working in a university development team.

Interested in gameplay systems, player mechanics and reusable game architecture. Currently looking for a **practical semester / internship opportunity in game development**.

HIGHLIGHTED PROJECTS

Tanks of Chaos — Solo Developer

Unity · C# · Steam · October – December 2024

- Developed and released a wave-based tank combat game independently on Steam.
- Implemented wave progression, multiple enemy behaviours, vehicle combat, upgrades and progression systems.
- Built persistent game data and support for multiple playable vehicles.
- Integrated Steam achievements and prepared the game for public release.

Pirate Jumper — Solo Developer

Unity · C# · Procedural Generation · March 2026

- Developed an endless runner with modular runtime level generation.
- Built reusable gameplay systems for temporary items and cosmetic character progression.
- Implemented local persistence for highscores, currency and character unlocks.
- Used Git consistently throughout development for version control.

Paruzzel — Gameplay Programmer

Unity · C# · Team of 5 · Summer Semester 2026

- Implemented first-person movement and raycast-based interaction systems.
 - Developed a physics-based object pickup and manipulation system.
 - Built a free-camera tool for testing and navigating puzzle rooms.
 - Contributed to early project planning, team meetings and gameplay decisions.
 - Worked with feature branches and resolved merge conflicts in a collaborative Git workflow.
-

EXPERIENCE

Board Member / Server Administration

KönigsNet e.V. · 2022 – Present

- Help maintain and administer the association's Linux-based server infrastructure.
- Perform system updates, manage device access and troubleshoot technical issues.
- Maintain access-related configuration and support recovery using existing backups.
- Assisted with rebuilding large parts of the server environment from backups.

Tutor — Data Communication

RWTH Aachen University · 2024

- Led weekly tutorials covering exercises and technical concepts.
- Answered student questions and supported students with coursework.
- Reviewed and graded submitted assignments.
- Assisted with grading final examinations.

Voluntary Social Year (FSJ)

Gemeinschaftsschule im Eichholz · September 2020 – August 2021

- Supported teachers with classroom and organisational tasks.
- Co-managed Microsoft Teams administration during the COVID-19 period.
- Created and distributed user accounts, reset passwords and provided technical support to teachers.
- Supervised students requiring on-site care during school closures.

TECHNICAL SKILLS

Programming

C# · Java

Game Development

Unity · Unity 2D · Unity 3D · Gameplay Programming · Player Controllers · Interaction Systems · Basic Enemy AI · Object Pooling · Wave Systems · Persistent Data · Modular Level Generation

Tools & Workflow

Git · GitHub · Feature Branches · Merge Conflict Resolution · Linux · Team Development

EDUCATION

B.Sc. Computer Science

FH Aachen – University of Applied Sciences

Winter Semester 2025 – Present

Computer Engineering

RWTH Aachen University

2025 · 1 Semester

Computer Science

RWTH Aachen University
2021 – 2024

Abitur

Goldberg-Gymnasium Sindelfingen
2020

LANGUAGES

German — Native

English — Very good proficiency
